Previous Research Experience

I am writing to express my enthusiastic interest in the Research Assistant position for the Digital Products and Platforms Practices at the National University of Singapore - Institute of Systems Science (NUS-ISS), as advertised. With a background in [relevant experience or education], I am excited about the opportunity to contribute to the innovative and dynamic environment at NUS-ISS.

My academic and practical experience has equipped me with a solid foundation in critical thinking, analytical reasoning, and an eye for detail—essential skills for effectively managing and refining course curricula. I am particularly drawn to the hands-on nature of the role, which aligns seamlessly with my passion for product management and commitment to staying abreast of industry trends.

Having explored the comprehensive overview of NUS-ISS's Digital Products and Platforms Practice, I am inspired by the institute's commitment to nurturing digital talent and leading the way in shaping the next curve of digital excellence. The prospect of actively participating in courseware analysis, recommending enhancements, and contributing to the evolution of product management education excites me. I am confident that my ability to manage tasks and timelines, coupled with a proactive approach to learning, will allow me to make meaningful contributions to the team.

Moreover, the emphasis on market and trend analysis resonates with my natural curiosity and dedication to staying informed about the latest advancements in the tech industry. I am eager to leverage my research and documentation skills to evaluate content topics, identify opportunities for improvement, and contribute to the ongoing success of the institute.

I am drawn to NUS-ISS not only for its reputable programs and experienced staff but also for its commitment to providing a hands-on and collaborative learning experience. As an aspiring product professional, I am excited about the prospect of working closely with industry experts, refining blended learning content, and contributing to the institute's continued success in developing digital leaders.

Thank you for considering my application. I am eager to bring my skills and passion for product management to NUS-ISS and contribute to the institute's mission of bridging future opportunities through cutting-edge education.

I look forward to the opportunity to discuss my candidacy further and explore how I can contribute to the success of NUS-ISS. Thank you for considering my application.

Research Goals

- INvestigate and research current industry trends in digital product management to learn methodologies, tools, and best practices.
- Explore and analyze existing courseware across modules to identify opportunities for streamlining concepts and unifying outcomes for enhanced learning experiences.
- Research major product management educators and communities to assess content topics and

trends, contributing to the ongoing evolution of our curriculum to meet the needs of our audience.
